

Welcome to the 2026 Pro North Hockey Skill Development program

Development is all about helping each player elevate their hockey skills

From passing and shooting to skating with control and speed down the ice. Our camp focuses on individualized skill development, ensuring every player works on their specific needs while mastering the fundamentals of the game.

At Pro North, we prioritize personal growth as much as we focus on improving hockey skills. We believe in valuing each player as an individual first, creating an environment that fosters confidence, teamwork, and a love for the game.

Notes for the parents:

-Players are put into a group and this will be their group for the next five days. Each group will have their own dressing room.

-If your player is sick, please do not send them to camp and please let us know.

-We have a very full count this year and we've had to stagger our start and end times to the day. Please make sure you know your player's schedule.

-Our kitchen staff will have all your players' contacts. If your player needs you, we will contact you. We have your player in our best interest!

-If your player needs to leave early, please send a note that morning and have your child give it to their Team Captain. Each player needs to be signed out at the kitchen when they leave early from camp or return to camp during camp time

-Players are not allowed cell phones at camp. You have trusted us with your player. If they have a concern, they can talk to their team captain, or any head coach and we will get in contact with you.

-Very important please make sure your players' name tag is always on their helmet. This is so our head instructors can give one-on-one developmental instructions to your player.

-Players will need their own water bottle, proper clothing for fitness center-ball cap and hockey stick for the outdoor session as well as full gear for on ice sessions.

Thank you for trusting us with your player. We're excited to work together and look forward to a fantastic week of growth and development on and off the ice.
